

**Technology in  
Today's Changing World -  
"Preparing for the Future"**

# 2010 Third Annual SHPE-DFW Technical Professional Conference

University of Texas at Dallas  
Richardson, Texas  
Friday, April 23, 2010

## Information Sheet

**The Society of Hispanic Professional Engineers (SHPE)** [www.SHPE.org](http://www.SHPE.org) is the nation's leading technical organization of its kind whose primary function is to develop the potential of Hispanics in Science, Technology, Engineering, and Math (STEM). Hispanic student enrollment is increasing at the undergraduate and graduate levels in STEM fields. However, to compete and succeed in today's technological workplace it is necessary to increase this momentum by identifying and addressing the developmental needs of the profession by providing seminars and workshops that are focused on current and future technological trends.

**The SHPE-DFW Chapter**, ([www.shpe-dfw.org](http://www.shpe-dfw.org)) is hosting the **2010 Third Annual SHPE-DFW Technical Professional Conference**. This conference is a forum that brings senior level executives and experts from area corporations, professional groups and academia, together with professionals working in the engineering and technical fields. The Conference targets technical professionals and focuses on two areas: 1) challenges, future trends and opportunities in technology and 2) professional career development to help participants prepare to meet those challenges and seek opportunities that will positively impact their respective careers.

This one-day event will highlight distinguished subject matter experts from participating corporations and academia who will share their insights on STEM in today's changing world. Participating are Raytheon, University of Texas at Dallas, SMU, Texas Instruments, DFW Airport Board, Lennox International, Fresenius Medical Care – NA, Microsoft and Verizon. A professional development workshop, *Super Lean Six Sigma*, by Master Black Belt Abraham Benavides and a tour of the UT-Dallas Engineering Facility are on the program. Area university students, NSHMBA, and NSBE are also invited. For more information, please call: (972) 386-8372.
